EXECUTIVE SUMMARY

Overall screening indicates a Medium overall inclusiveness risk driven by reading/writing and attention/task-completion indicators (dyslexia and attention-related screens). Other areas (technology, visual/hearing accessibility, social communication and mood) show low risk but include practical, light-touch adjustments that may improve participation and assignment quality. This is a screening report to guide support planning; it is not diagnostic.

KEY FINDINGS & RECOMMENDED RESPONSES

Reading and written expression

MEDIUM

Finding: Often reports of reading fatigue and difficulty writing clearly, plus sometimes needing to re-read and occasional spelling/copying errors.

Recommended Response: Provide structured writing templates, reduce reading load with chunked materials, and allow extra time or drafting support; consider further dyslexia-related screening if impacts continue.

Attention, task initiation and completion

MEDIUM

Finding: Regular difficulty sustaining focus, delaying starts and moving on before finishing tasks; reported impact on learning and assignments.

Recommended Response: Agree weekly planning, break assignments into milestones, use reminders and short focused check-ins to support progress.

Session accessibility and review

LOW

Finding: Often benefits from captions, transcripts or written summaries to support review and understanding.

Recommended Response: Ensure captions/transcripts where available and provide short written summaries or key-bullet notes after sessions.

Technology access and confidence

LOW

Finding: Rare LMS navigation issues and occasional overwhelm with multiple systems, but no impact on attendance or submissions.

Recommended Response: Share a concise LMS quick-guide and offer optional test-run support for sessions.

Wellbeing and energy

LOW

Finding: Sometimes tired or affected by sleep routine which can influence starting or completing tasks.

Recommended Response: Use wellbeing-informed pacing and offer optional wellbeing-informed adjustment discussion if needed.

Communication confidence

LOW

Finding: Generally confident; occasional pre-presentation nerves reported rarely.

Recommended Response: Offer low-pressure rehearsal and allow prompt cards or short rehearsal before presentations if requested.

SUPPORT PLAN

DIGITAL SUPPORT

- Share a concise LMS quick-guide at programme start and signpost help channels.
- Offer optional test-run for joining online sessions and using meeting tools.

LEARNING SUPPORT

- Agree a weekly study plan with short milestones and priorities.
- Provide planning templates and paragraph/structure frames for written assignments.
- Offer brief written summaries and clear step-by-step instructions during sessions.

WELLBEING SUPPORT

- Use wellbeing-informed pacing for assignment deadlines (break tasks into smaller steps).
- Offer optional check-in to discuss sleep/energy strategies and flexible scheduling where possible.

ASSIGNMENT SUPPORT

- Break assessed tasks into staged milestones with interim deadlines and clear success criteria.
- Allow additional time for drafting/re-drafting and offer proofreading or peer/human checks where appropriate.

COMMUNICATION SUPPORT

- Provide optional short rehearsals for presentations and allow prompt cards or notes during live tasks.
- Use structured participation options in live sessions (think-time, voluntary contributions).

ACCESSIBILITY ADJUSTMENTS

- Ensure live/recorded sessions have captions or transcripts where available.
- Provide downloadable slides, typed handouts and allow zoomable formats for PDFs.

PRIORITY ACTIONS

Priority	Owner	Action	Due Date
High	Coach	Agree a simple weekly learning plan with John, including short milestones and a step-by-step approach to key assignments.	Within 2 weeks
High	Tutor	Provide a planning template and guidance on expected structure for the next written assessment; consider staged submission where feasible.	Before the next assessed task
Medium	Support Team	Confirm availability of captions/transcripts and arrange short written summaries or key-bullet notes after sessions.	Within 2 weeks
Medium	Support Team	Provide organisation templates, reminder-system options and a simple file-naming convention	Within 3 weeks

Priority	Owner	Action	Due Date
		to trial with the learner.	
Medium	Learner	Trial practical strategies: read in short sections, use a drafting template for written work and trial one task-start strategy; report back what helps.	Over the next 4 weeks
Low	Coach	Share a concise LMS quick-guide and confirm John knows where to get help for log-ins and recordings.	Within first 2 weeks of the module
Low	Tutor	Offer optional low-pressure rehearsal or 510 minute pre-presentation check-in before any assessed verbal presentation.	As needed / before presentations

 NEXT FORMAL REVIEW
12 weeks

MANAGER BRIEF

Medium overall risk due to reading/writing and attention/task completion indicators; light-touch adjustments recommended.

What Needs Attention:

- Reading-related fatigue and clarity of written work (may affect assignment quality).
- Starting and finishing tasks, sustaining focus during sessions (may affect deadlines and progress).
- Provide accessible session materials (captions/transcripts and short summaries) to support review.

What Is Already in Place:

- No immediate technology access issues reported; learner engages with online tools.
- No significant wellbeing or social communication barriers reported that require urgent action.

Recommended Next Step: Coach to agree a weekly plan and short milestones within 2 weeks, and Tutor to provide planning templates before the next assessed task. Monitor progress and consider further screening if barriers persist.

Note: This report is based on learner self-report screening responses. It is not a diagnostic assessment. It should be used to guide support planning, reasonable adjustments and referrals where appropriate.
